DON'T BOTHER...

World-famous music critic Nathan Thomas Lee knows when to bother and when not to. When asked what to call it in his iTunes list, he suggested this title. Yet, lo and behold: upon listening, not only did it meet his criteria for not sucking one's life, soul, and jorgumrands, he may actually have found a few of the tracks minimally satisfactional. If this be true, you're sure to love "Don't Bother..." for its upbeat yet atmospheric, guitar-heavy but synthesized grooves! Once disparaged as DJ Poseur's "useless brother", Nathan's high tastes are bringing musical joy for all. Forever and ever.

DON'T BOTHER...IT'S GOING TO SUCK!

Note that no claims of quality are made for the Japanese songs near the end. Those were kinda tossed on 'cause we ran out of precision-crafted Nathan-centric trax! What are you waiting for? Put it on and let the groove reign on for all eternity!
